

## Haifa MAP

Haifa MAP by Haifa — is mono ammonium phosphate (12-61-0) — a fully soluble source of phosphorus and nitrogen that supports strong early root development. Buy from Agrifirst, exclusive Haifa partner for North India.

### DESCRIPTION

**Haifa MAP** is mono ammonium phosphate (12-61-0) — a fully soluble source of phosphorus and nitrogen that supports strong early root development. As part of Haifa's globally trusted specialty range, it is manufactured to consistent, high-purity standards and is fully water-soluble for clog-free fertigation.

### Key benefits

Very high phosphorus for root establishment and early vigour

Fully water-soluble and residue-free for clean fertigation

Useful as a starter and through the vegetative phase

Compatible with most water-soluble fertilizers

### Composition & how to use

#### 12-61-0 (mono ammonium phosphate)

Applied by drip fertigation, especially early in the crop for rooting and establishment; keep separate from calcium stock tanks. For best results, Agrifirst agronomists will build a crop-specific feeding schedule based on your crop, soil, water quality and growth stage.

## Best-suited crops

All transplanted and direct-seeded vegetables, fruit crops and flowers needing strong early P.

### Why buy Haifa MAP from Agrifirst?

Agrifirst is the **exclusive Haifa partner for North India**. You get 100% genuine Haifa product, expert crop-nutrition guidance and reliable doorstep supply — plus a tailored program that gets the most out of every application.
