

Haifa Micro Fe 13

Haifa Micro Fe 13 by Haifa — is EDTA-chelated iron (13%) that quickly corrects iron chlorosis, fully soluble for Nutrigation and foliar application. Buy from Agrifirst, exclusive Haifa partner for North India.

DESCRIPTION

Haifa Micro Fe 13 is EDTA-chelated iron (13%) that quickly corrects iron chlorosis, fully soluble for Nutrigation and foliar application. As part of Haifa's globally trusted specialty range, it is manufactured to consistent, high-purity standards and is fully water-soluble for clog-free fertigation.

Key benefits

Fast correction of iron-deficiency yellowing (chlorosis)

EDTA chelation keeps iron soluble and plant-available

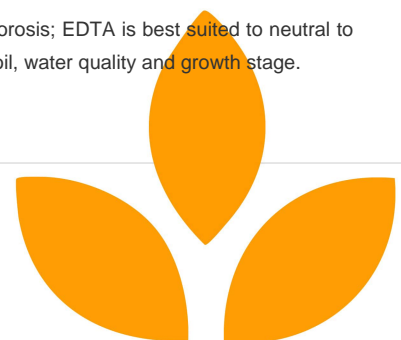

Fully water-soluble for drip and foliar use

Restores leaf colour, photosynthesis and growth

Composition & how to use

EDTA-chelated iron (13%)

Applied through fertigation or as a foliar spray at the first signs of iron chlorosis; EDTA is best suited to neutral to slightly acidic soils. For best results, Agrifirst agronomists will build a crop-specific feeding schedule based on your crop, soil, water quality and growth stage.

Best-suited crops

Fruit trees, vegetables, flowers and hydroponic crops on neutral to mildly acidic soils.

Why buy Haifa Micro Fe 13 from Agrifirst?

Agrifirst is the **exclusive Haifa partner for North India**. You get 100% genuine Haifa product, expert crop-nutrition guidance and reliable doorstep supply — plus a tailored program that gets the most out of every application.
