

Haifa MKP

Haifa MKP by Haifa — is mono potassium phosphate (0-52-34) — a highly soluble, chloride-free source of phosphorus and potassium, ideal during flowering and fruiting. Buy from Agrifirst, exclusive Haifa partner for North India.

DESCRIPTION

Haifa MKP is mono potassium phosphate (0-52-34) — a highly soluble, chloride-free source of phosphorus and potassium, ideal during flowering and fruiting. As part of Haifa's globally trusted specialty range, it is manufactured to consistent, high-purity standards and is fully water-soluble for clog-free fertigation.

Key benefits

High phosphorus and potassium with no nitrogen — perfect for the reproductive stage

Free of chloride, sodium and nitrogen; fully water-soluble

Supports flowering, fruit set, sizing and root development

Also used in foliar sprays and as a phosphite-free P source

Composition & how to use

0-52-34 (mono potassium phosphate)

Applied by drip fertigation or foliar spray, mainly at flowering and fruit development; keep separate from calcium stock tanks. For best results, Agrifirst agronomists will build a crop-specific feeding schedule based on your crop, soil, water quality and growth stage.

Best-suited crops

Grape, pomegranate, tomato, capsicum, onion, potato, flowers and most fruiting crops.

Why buy Haifa MKP from Agrifirst?

Agrifirst is the **exclusive Haifa partner for North India**. You get 100% genuine Haifa product, expert crop-nutrition guidance and reliable doorstep supply — plus a tailored program that gets the most out of every application.
