

Multi-K pHast

Multi-K pHast by Haifa — is an acid-stabilised potassium nitrate designed for hard and alkaline irrigation water, delivering potassium and nitrate-nitrogen while helping keep drip systems clean. Buy from Agrifirst, exclusive Haifa partner for North I

DESCRIPTION

Multi-K pHast is an acid-stabilised potassium nitrate designed for hard and alkaline irrigation water, delivering potassium and nitrate-nitrogen while helping keep drip systems clean. As part of Haifa's globally trusted specialty range, it is manufactured to consistent, high-purity standards and is fully water-soluble for clog-free fertigation.

Key benefits

Lowers the pH of the nutrient solution, reducing scaling and emitter clogging

Delivers the proven benefits of Multi-K potassium nitrate in problem water

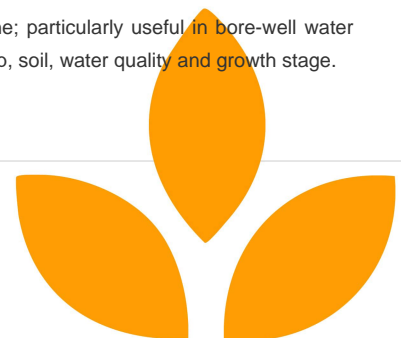

Free of chloride and sodium; fully water-soluble

Improves fertigation reliability and system life

Composition & how to use

acid-stabilised potassium nitrate

Applied through drip fertigation where water is hard or alkaline; particularly useful in bore-well water with high bicarbonates. For best results, Agrifirst agronomists will build a crop-specific feeding schedule based on your crop, soil, water quality and growth stage.

Best-suited crops

All fertigated vegetables, fruit and flower crops, especially where water quality causes drip clogging.

Why buy Multi-K pHast from Agrifirst?

Agrifirst is the **exclusive Haifa partner for North India**. You get 100% genuine Haifa product, expert crop-nutrition guidance and reliable doorstep supply — plus a tailored program that gets the most out of every application.
